

In-house Painting and Coating Services

Renown Engineering offer specialist surface preparation and protective coatings from its in-house paint facility. NACE coating, anti-corrosive coating and painting are all provided. We also have a NACE coating inspector on-site, and our company can deliver to NORSOK standards.

Surface Preparation and Protective Coatings

Renown Engineering's specialist painting and coating team works to the customer's exact requirements. With our in-house facilities and team of expert staff we provide a premium level of service throughout the entire coating process.

From our environmentally controlled paint shop we provide an extensive range of surface preparation, pre-treatment solutions, base coating and priming. This can include abrasive blast, gas arc metal spray, steam clean, airless spray, electro spray and many others.

We are also able to offer high quality solutions through our use of anti-corrosive resistant primers, specialist coatings and finishes which include but are not limited to, epoxy, polyurethane, ceramic, silicone and latex.

NORSOK Specifications

Renown Engineering can provide a coating service to NORSOK specifications. This includes Ceram-Kote, a ceramic composite epoxy coating that provides excellent abrasion and corrosion protection in harsh environments.

High Build Epoxy is also available, which ensures excellent resistance to wear, acidic contact and industrial usage whilst retaining an attractive aesthetic.

NACE Coating Inspectors

Renown Engineering approves paint specifications and application by providing customers with our on-site NACE Coating Inspector, ensuring quality paint finish and approval as part of the same service. Contact us to discuss your painting and specialist coating requirements.
